

UNIVERSITY OF BOLTON
OFF CAMPUS DIVISION
WESTERN INTERNATIONAL COLLEGE
BENG (HONS) MECHANICAL ENGINEERING
TRIMESTER ONE EXAMINATION 2021/2022
ENGINEERING MODELLING AND ANALYSIS
MODULE NO: AME5014

Date: Thursday 6th January 2022

Time: 10:00am – 12:00pm

INSTRUCTIONS TO CANDIDATES:

There are FIVE questions on this paper

Answer ANY FOUR questions only

All questions carry equal marks

Marks for parts of questions are shown in brackets.

Electronic calculators may be used provided that data and program storage memory is cleaned prior to the examination.

CANDIDATES REQUIRE :

Formula Sheet (attached)

University Of Bolton
 Western International College
 BEng(Hons) Mechanical Engineering
 Trimester One Examination 2021/2022
 ENGINEERING Modelling and Analysis
 Module No. AME5014

Q1

- a) Determine the area enclosed by the two curves $y = x^2$ and $y^2 = 8x$ as shown in figure Q1 below, If this area is rotated 360° about the x-axis determine the volume of the solid of revolution produced by integration method.

(15 Marks)**Figure Q1.**

- b) The attitude of employees towards the new company policy is tabulated below. The employees are grouped according to their job descriptions: Mechanical engineer, Programmer or System engineer.

Attitude	Mechanical engineer	Programmer	System Engineer
Like	46	168	196
Indifferent	100	572	1148
Dislike	32	248	1076

Use a Chi-squared test (χ^2) to check the hypothesis that there are variations in attitude depending on job description and Test at 5% level.

(10 marks)**Total 25 marks****PLEASE TURN THE PAGE.....**

 Trimester One Examination 2021/2022
 ENGINEERING Modelling and Analysis
 Module No. AME5014

Q2

The ordinary differential equation (ODE) describing the displacement $y(t)$ in mm at time 't' in secs of a voice box simulator can be modelled approximately by the equation below::

$$2 \frac{d^2 y(t)}{dt^2} + 5 \frac{dy}{dt} - 3y = 0$$

Given that when $t = 0$, $y = 4$ and $dy/dx = 9$

i. Use Laplace transforms to derive an expression for $y(t)$ and

(20 marks)

ii. Sketch how $y(t)$ varies with time for the first 5 seconds

(5 marks)

Total 25 marks

Q3

The stress σ , in MPa, at a point in a body can be described by the following matrix A relative to the global co-ordinate system xyz.

$$\begin{pmatrix} -1 & -1 & 1 \\ -4 & 2 & 4 \\ -1 & 1 & 5 \end{pmatrix}$$

a) Using an appropriate technique, determine the Eigen values (i. e., all the principal stresses acting on the body)

(15 marks)

b) Determine also the associated Eigen vector for the largest principal stress.

(10 marks)

Total 25 marks

ENGINEERING Modelling and Analysis
Module No. AME5014

Q4

A large marquee is to be made in the form of a rectangular box-like shape with canvas covering on the top, back and sides. If the volume of the marquee is to be made 250 m^3 , determine the following

- a) Sketch the open rectangular box with proper dimensions. (5 marks)
- b) the dimensions of the open rectangular box (10 marks)
- c) Show that the total surface area is minimum. (5 marks)
- d) the minimum surface area of the canvas (5 marks)

Total 25 marks

Q5

a) The second moment of area of a rectangle is given by $I = (b t^3)/3$. If breadth, b and thickness, t is measured as 40mm and 90mm respectively and the measurement errors are -5mm in b and $+8\text{mm}$ in t , find the approximate error in the calculated value of I with proper units.

(12 marks)

b) The pressure, P , volume, V and temperature, T of a gas are related by $PV = kT$, where k is a constant. Determine the total differentials

i) dp

(7 marks)

ii) dT

(6 marks)

in terms of p , V and T .

Total 25 marks
