SEMESTER ONE EXAMINATIONS 2022/2023

MANAGEMENT ACCOUNTING AND DECISION MAKING

MODULE NO: ACC5002

Date: Tuesday 10th January 2023

Time: 4:00 – 7:00

INSTRUCTIONS TO CANDIDATES:

There are <u>SIX</u> questions on this paper.

Answer <u>FOUR</u> questions as follows: TWO questions in Section A TWO questions in Section B

This is a closed book examination.

You must hand in this exam paper with your answer booklet.

Use of calculators is allowed.

Discount tables and Formula sheet are attached at the back of this question paper.

SECTION A - ANSWER 2 QUESTIONS ONLY FROM THIS SECTION

Question 1

Bridge Co Fisheries catch and process crabs. There are four employees processing and dressing the crabs which are then supplied to local markets.

The time allowed to dress and prepare a crab is 3 standard minutes. Each employee works a standard 35-hour week, although overtime is often worked. The standard labour rate per hour is $\pounds 6.20$.

The standard material cost per crab is £1.30 but not all the crabs processed, i.e. dressed, meet the quality standard as wastage occurs.

The budgeted fixed cost for the month is £3,750. For the month of August 20X2, its budgeted output was 12,000 'dressed crabs', or 3,000 units per week. During the week ending 18 August 20X2:

- 3,050 crabs were dressed satisfactorily but 3,110 were used.
- The actual cost of the crabs was £4,354.
- The actual hours worked were 162.
- The actual cost of labour for the period was £1,021.
- The fixed overheads incurred were £990.

Question 2

Sadiq & Co is a multi-divisional company. One of the divisions has net assets of \$420,000. The profit statement for the division for the latest period is as follows:

	£
Revenue	630,000
Variable costs	(390,000)
Contribution	240,000
Attributed fixed costs	(180,000)
Allocated central costs	(25,000)
Divisional Profit	35,000

The divisional manager is considering investing in a machine costing \$50,000. The machine would earn annual profits, after depreciation, of \$5,500. The company's cost of capital is 10%.

Additionally, the divisional manager wishes to have some additional information on transfer pricing policies and would require your advice.

Required:

a)

И.

I. Calculate the division's controllable return on investment, without the new machine (to 1 decimal place)?

(2 marks)

Compute the division's controllable return on investment, with the new machine (to 1 decimal place)?

(3 marks)

Evaluate the controllable residual income for the division without the new machine?

(2 marks)

IV. Calculate the controllable residual income for the division with the new machine?

(3 marks)

Question 2 continues over the page PLEASE TUI

Question 2 continues

b) Evaluate the strengths and weaknesses of using Return on Investment as a performance measure tool over Residual Interest.

(8 Marks)

c) Analyse the characteristics of a good transfer price policy and the methods of transfer pricing.

(7 marks)

Total 25 Marks

Question 3:

All projects require an initial investment of £1,250,000 and the net cash flows for each of the project are as follows:

	Project Ant	Project Bot	Project Cut
	£	£	£
Year 1	300,000	119,000	114,000
Year 2	500,000	60,000	236,000
Year 3	725,000	125,000	452,500
Year 4	127,000	557,000	521,500
Year 5	658,000	96,000	421,000

In addition, at the end of the five-year project, the assets initially bought for Project Bot will be sold for £320,000.

The cost of capital is 10% for all projects.

Question 3 continues over the page PLEASE TURN THE PAGE

Question 3 continues

Required:

(a) Compute the Net Present Value (NPV) for each project and recommend which project should be taken up.

(10 marks)

(b) Calculate the payback period for Project Ant only.

(3 marks)

(c) Calculate the Accounting Rate of Return (ARR) for Project Bot using the average method.

(3 Marks)

(d) Calculate the Internal rate of return (IRR) for Project Cut only.

(4 Marks)

(e) Critically evaluate the use of future cash flows over accounting profits in capital investment appraisal.

(5 Marks)

Total 25 Marks

SECTION B - ANSWER 2 QUESTIONS ONLY FROM THIS SECTION

Question 4 Part (a)

Javed Co is an engineering company that specialises in providing engineering facilities to businesses that cannot justify operating their own facilities in house. Javed Co employs a number of engineers who are skilled in different engineering techniques that enable Javed Co to provide a full range of engineering facilities to its customers.

Most of the work undertaken by Javed Co is unique to each of its customers, often requiring the manufacture of spare parts for its customers' equipment, or the building of new equipment from customer drawings. As a result most of Javed Co's work is short-term, with some jobs being completed within hours while others may take a few days.

To date, Javed Co has adopted a cost plus approach to setting its prices. This is based upon an absorption costing system that uses machine hours as the basis of absorbing overhead costs into individual job costs. The Managing Director is concerned that, over recent months, Javed Co has been unsuccessful when quoting for work with the consequence that there has been an increase in the level of unused capacity. It has been suggested that Javed Co should adopt an alternative approach to its pricing based on marginal costing since 'any price that exceeds variable costs is better than no work'.

Required:

With reference to the above scenario:

I. Evaluate absorption and marginal cost approaches to pricing.

(10 Marks)

Discuss the validity of the comment 'any price that exceeds variable costs is better than no work'.

(5 Marks)

Question 4 continues over the page

Page 8 of 13

Part (b)

JBS Co is considering whether to administer its own purchase ledger or to use an external accounting service. It has obtained the following cost estimates for each option:

Internal service department

Purchase hardware/software Hardware/software maintenance Accounting stationery Part-time account clerk **Cost** £320 pa £750 pa £500 pa £6,000 pa

External services	Cost	Volume
Processing of invoices/credit notes	£0.50 per document	5,000 pa
Processing of cheque payments	£0.50 per cheque	4,000 pa
Reconciling supplier accounts	£2.00 per supplier	150
	per month	suppliers

Required:

Evaluate the cost effectiveness of outsourcing the accounting activities and identify the qualitative factors involved.

Question 5

Budgets contribute to performance management by providing benchmarks against which to compare actual results and develop corrective measures. Budgets give managers 'preapproval' for execution of spending plans and allow them to provide forward looking guidance to investors and creditors.

Required:

- a) Evaluate the following approaches to budgeting:
 - I. Imposed budget and participatory budget
 - II. Incremental Budget
 - III. Zero based budgeting
 - IV. Activity based budgeting
 - V. Rolling Budget

(20 Marks)

b) Analyse the issues that should be considered before changing to a new budgetary system.

Page 10 of 13

University of Bolton Off Campus Division – Western International College BA(Hons) Accountancy Semester One Examination 2022/2023 Management Accounting and Decision Making Module No. ACC5002 Question 6 Part (a)

Z Ltd makes three products, A, B and C, for which unit costs, machine hours and selling prices are as follows:

	Product A	Product B	Product C
Machine hours	10	12	14
	£	£	£
Direct materials			
@ £0.50 per kg	7	6	5
Direct wages			
@ £7.50 per hour	9	6	3
Variable overheads	3	3	3
		<u> </u>	
Marginal cost	19	15	11
Selling price	25	20	15
Contribution	6	5	4

Sales demand for the period is limited as follows.

Product A		4,000
Product B	Y	6,000
Product C		6,000

Company policy is to produce a minimum of 1,000 units of Product A.

The supply of materials in the period is unlimited, but machine hours are limited to 200,000 and direct labour hours to 5,000.

Page 11 of 13

University of Bolton Off Campus Division – Western International College BA(Hons) Accountancy Semester One Examination 2022/2023 Management Accounting and Decision Making Module No. ACC5002

Question 6 continues

Required:

(a) Evaluate the production levels that should be adopted for the three products in order to maximise profitability, and calculate the maximum contribution.

(12 Marks)

Part (b)

The balanced scorecard approach to performance measurement and control emphasises the need to provide management with a set of information which covers all relevant areas of performance.

Required:

Evaluate the four perspectives of the balanced scorecard as a performance measurement tool and any associated problems with it.

Page 12 of 13

University of Bolton Off Campus Division – Western International College BA(Hons) Accountancy Semester One Examination 2022/2023 Management Accounting and Decision Making Module No. ACC5002

<u>Formula</u>

Internal Rate or Return (IRR)

$$IRR = r_a + \frac{NPV_a}{NPV_a - NPV_b} (r_b - r_a)$$

- r_a = lower discount rate chosen
- r_b = higher discount rate chosen

 $N_a = NPV at r_a$

 $N_b = NPV at r_b$

Present Value Table

Present value of 1 i.e. (1 + r)⁻ⁿ

Where r = discount rate

n = number of periods until payment
