University of Bolton
Off Campus Division – Western International College
BSc (Hons) Psychology
Semester One Examination 2024/2025
Biopsychology
Module No: PSC5005

Section A: Answer ONE question from the following three questions

1. Hormones

Using specific examples, illustrate the role played by the nervous system in terms of the interaction between hormones and behaviour.

2. Pain

Describe the biological mechanism suggested by the Gate Control Theory to explain the psychological dimension of pain.

3. Neurodevelopment

Using specific examples, illustrate the importance of environmental factors on the postnatal development of neural structures.

Section B: Answer this question

In terms of the brain disease model of addiction:

- a. Consider and provide a full description of the three-stage cycle of addiction from a biopsychological perspective
- b. Evaluate to what extent the inclusion of the allostatic process has contributed to the model.

Section C: Answer this question

Our understanding of how humans make judgements of trustworthiness from faces, has been derived from empirical studies using multiple techniques. With reference to at least three studies, evaluate how our understanding of the role the amygdala plays in these judgements has been developed over time.
