<p>Aims of the programme</p>	
<p>The principal aims of the programme are:</p> <ol style="list-style-type: none"> 1. To develop and extend appropriate knowledge and skills to underpin work in the early years sector, recognising the need to embrace new developments. 2. To develop flexible practitioners able to work within and across professional boundaries. 3. To produce students with a strong academic and vocational background for employment in the Early Years sector or progression onto further academic programmes of study. 4. To develop transferable skills for use in the workplace. 5. To develop you as a reflective practitioner and setting this in a life long learning context. 6. To develop critical awareness of current issues within childcare studies and practice. 7. To develop proficiency in professional and practical skills associated with your area of expertise. 8. To uphold the Bolton values of social, public and ethical responsibility and environmental sustainability. 	
<p>Distinctive features of the programme A well established and professionally respected course that is an exemplar of collaborative</p>	

working within the University.

The rationale and design of the programme continues to use the criteria for sector endorsement as a reference point of good practice.

The emphasis on the integration of work based learning ensures that the child and his/her parents are at the heart of all learning.

Employers have always been involved with monitoring and evaluation of the programme both as workplace mentors and as students on the course.

The Common Core of Skills and Knowledge for the Children's Workforce is an external reference point that is embedded within the programme to ensure appropriate skills for multi-agency working are developed.

The course has been developed to be delivered with the needs of both practitioners and employers in mind with opportunities for flexible delivery.

Successful completion of the course may enable you to progress onto the BA Hons Early Childhood Studies Top-up degree.

Learning and teaching strategies

Lectures will introduce the key learning for each module, followed by classroom based activities that apply learning and theoretical perspectives to work based scenarios. You will be supported in the development of independent research skills through formative feedback and directed reading. You will be expected to increase your ability to work independently in the later part of the course.

Tutorials will be included as part of each module programme. The Practice Trainer will develop your professional practice through observations in the workplace and professional 1:1 discussions.

Assessment strategy

A variety of assessment methods are used throughout the course, these include, essays, presentations, case studies, activity plans, reflective accounts, critical evaluations and in the final module an independent study in an area of your practice. Each piece of assessment will require you to apply theoretical perspectives to your practice and the work setting. You will complete a PDP Portfolio in the Study Skills module as part to the summative assessment.

Group discussions, class based activities and 1:1 tutorials will form part of the formative assessment strategy, in addition to reflective accounts on your learning which will be included in your PDP portfolio. The role of the Practice Trainer is also to give feedback in the work place to develop your professional and practical skills.
